MOBOTIX 7 – Hemispheric Technical Data

Q71/c71 – all-round view has never been more complete

When it comes to providing a 360° all-round view by day and night, MOBOTIX hemispheric camera technology is so compact, so complete and so versatile as never before. **A 4K UHD resolution** and WDR ensure **brilliant image quality and impressive details**. The audio function completes the range of features offered by these powerful pieces of equipment. Everything is well protected in the robust aluminum housing for discreet and reliable use.

IR and white light – the Q71 makes the night colorful!

For the first time, **day and night sensors, infrared and LED white light** are combined in a single hemispherical camera. This means that the Q71 delivers brilliant images around the clock – and thanks to the LED, **even the night can be viewed in spectacular color!**

MOBOTIX 7 – Video analysis has never been so comprehensive!

The Q71/c71 are part of the **MOBOTIX 7 platform** with its intelligent video analysis apps. A large number of existing Certified Apps already cover numerous applications, such as loitering, unattended baggage or facial recognition. You can also develop and implement your own camera apps. This is how new solutions are created time and time again. We will be happy to support you with the programming. **All currently available Certified Apps** are pre-installed and **can be tried free of charge for 30 days!**
