Keep Customers, Employees, Guests, and Family Connected

Combining unmatched performance with ease of installation, CEL-FI GO G41 is a single-operator cellular signal booster that delivers reliable in-building 4G and 5G connectivity for “small box” retail stores, branch offices, and homes. In addition to featuring the latest Nextivity proprietary 4th generation IntelliBoost technology, GO G41 can be installed in as little as one day and can be monitored and managed remotely via the Nextivity WAVE Portal. GO G41 also gives you the flexibility to select and switch which mobile network operator (MNO) signal to boost via the Nextivity WAVE App.

Enjoy the Benefits of Reliable Coverage

Whether you're a business owner wanting to improve connectivity for customers and employees or live in a rural area and need to boost signal in your home, GO G41 makes it easy to equip your building with reliable coverage. With the strong signal indoors, you'll have access to:

- Reliable calling, texting, and streaming
- Customers can enjoy in-store digital couponing for an enhanced shopping experience
- Staff and systems will have the connectivity to speed transactions and improve operations

Powered by IntelliBoost

Equipped with the latest 4th generation Nextivity proprietary IntelliBoost chip, GO G41 delivers unmatched signal boosting performance that sets it apart from traditional wideband repeaters. The same technology found in our flagship CEL-FI QUATRA products, IntelliBoost allows GO G41 to deliver channelized signal boosting and industry-leading signal gain up to 100 dB, which ensures reliable, end-to-end coverage in your building.

CEL-FI GO G41

Enhance Your Coverage:

Strong 4G and 5G connectivity inside your building

4th Generation IntelliBoost Chip:

Latest Nextivity proprietary chip ensures industry-leading performance

Global Flexibility:

Band configuration flexibility to support operator networks worldwide

Fast Installation:

System can be installed and activated in as little as one day

Operator Switching:

Select which signal to boost and easily change via the WAVE App

Remote Monitoring:

View performance data via WAVE Portal (enterprise installs only)
